### **Application Service Provider Privacy & Security Policies**

<b>Access</b>	Access is restricted to the specific customer for their database. Our support team also has access when appropriate to support the customer.
<b>Authorization</b>	The customer authorizes which users they want access to the system.
<b>Authentication</b>	This is done via Active Directory, no passwords are stored in our application.
<b>Audit</b>	The product has an audit functionality built into the product.
<b>Secondary Uses of Data</b>	We can use deidentified data for certain allowed purposes.
<b>Data Ownership</b>	Customer owns the data.
